The power of digital transformation is embracing every industry sector and to stay competitive in the digitalized world we need innovation beyond digital transformation. Our people help you to secure the data and optimize your investment in IT with cost control at the heart of everything we do.

Sales & Operation Procedures

Doing the right thing at the right time will make the difference between succeeding and losing.

The sales and operations planning (S&OP) process is crucial to any successful business. To coordinate across business units, increase transparency, balance supply, and demand, and achieve profitability.

Why S&OP

Giving a clear process for new projects

Giving clear steps for acquiring new items

Managing our stocks well

Reaching our targeted sales

Constantly gauging our performance

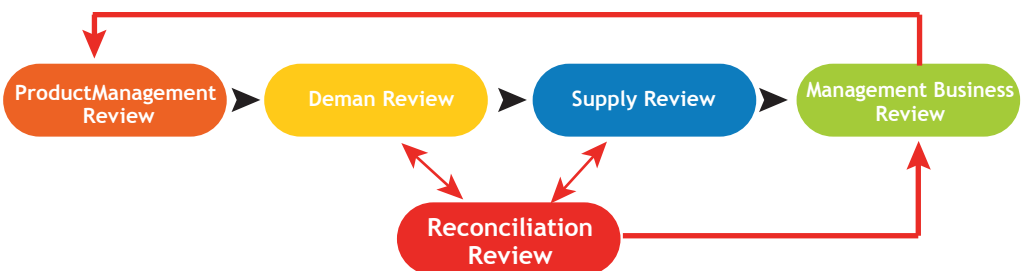

Being more familiar with our customers

Having more precise forecast

Evaluating the business every month

Having more accurate business data

Ensure our staffs are constantly educated.

Forecasting / New Product Instructions:

- Review status of current projects....
- Stage calendarize decisions...
- Review changes to plan and implications.....

Demand Review:

- Timely aggregated unconstrained Forecast Volume & Value ...
- Data Assumptions... Sensitivity...

Summarized assumptions Vulnerability & opportunity... Focus on change... Promotions & Initiatives. Pricing. Statistical Projections.... Market Intelligence... Demand Levers... Customer Likes

Supply planning:

- Communicate & coordinate... Review Issue & Options... Capacity... Hedging strategy...
- What if... Change & Impact... Alternatives plans with Implication...
- Seasonality Pattens... Demonstrated Performance... Improvement

Financial Reconciliation:

- Review and discuss implications of demand/supply imbalances ...
- Review gaps between SOP and budget and last plan...
- Orchestrates discussion.... Prepare issues for Senior Management review...

Finalize and implement S&OP (review Meeting)

S&OP software shortens planning cycles, by reducing labor costs, and boosting productivity. The exact steps can vary depending on the company, its products, and its industry.

Software Suits:

ICT Infrastructure :

Communications Tech Text, Voice & Video

Ip Phone & PABox
Video conference system

Storages services:

Cloud backup

Active Directories

Virtual Machines

Cyber Security :

a: End Point security, Ransomware

b: Antivirus

c: Firewalls

IT infrastructures Services:

Design, installation, migration and maintenance services
 IP Telephone
 Security cameras
 Video Conference Systems
 Routing & Switching (LAN, WAN)
 Wireless network
 Threat Management

Windows Server
 Windows Server Active Directory
 Linux servers
 Data Center Services
 Operating System Management
 Database Management Services
 Backup and Restoration Service
